TWO AI TOOLS

One tells you what it can't do

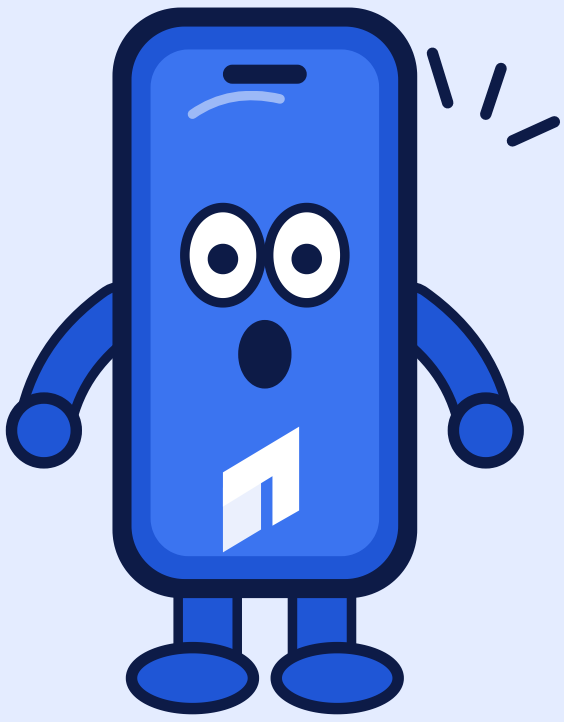

Guess which one we'd let near your customers.

SWIPE →

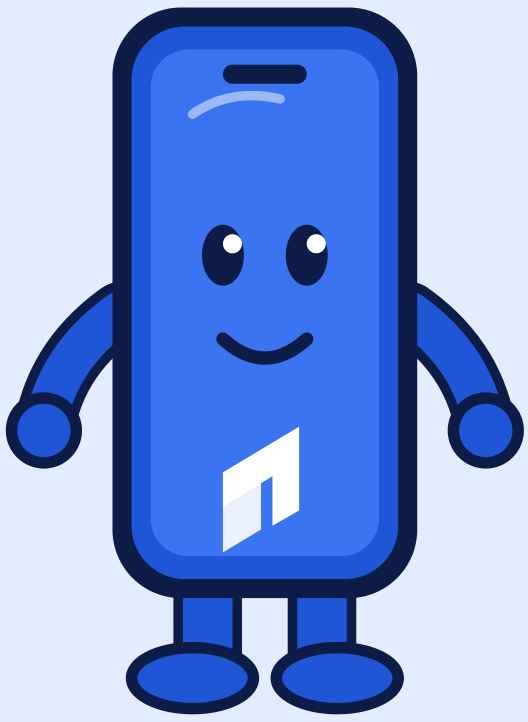

❌ The shiny one

Claims it does everything. Tested on real customers. Forgotten after launch.

✅ The boring one

Lists what it doesn't do yet. Tested on made-up data first. Watched after launch.

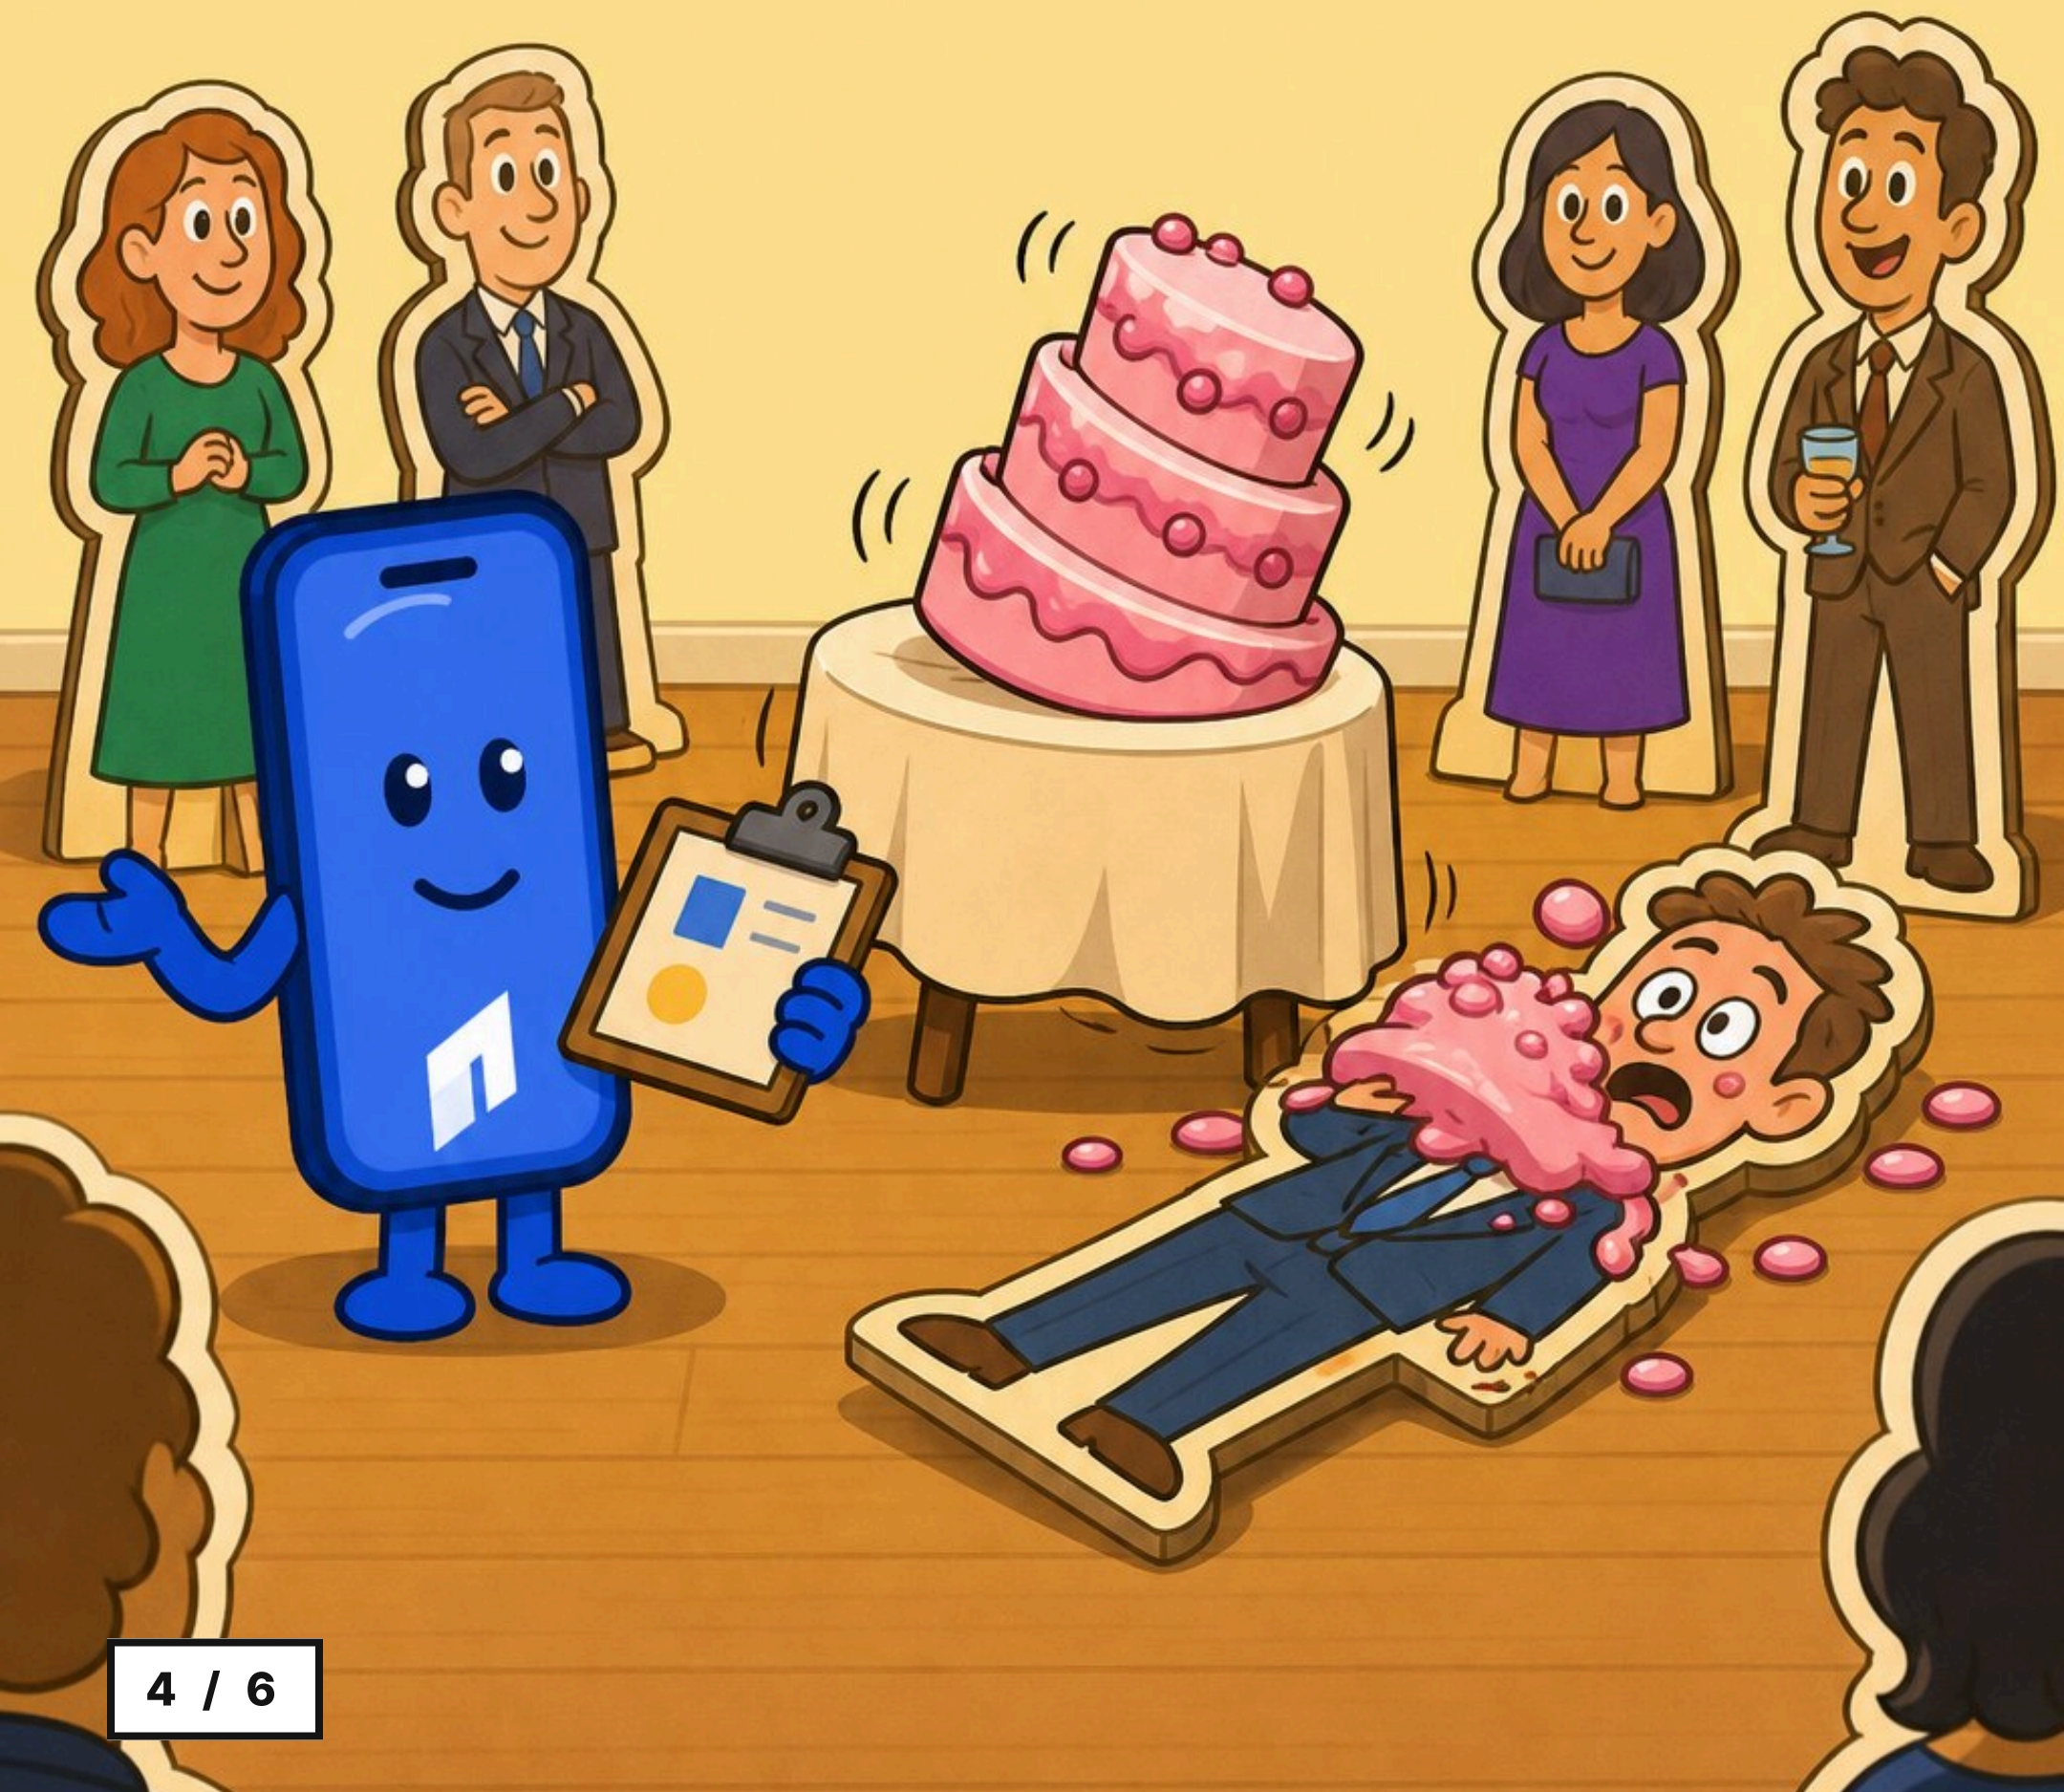

BEFORE

Testing on real people is how you find out **in public**.

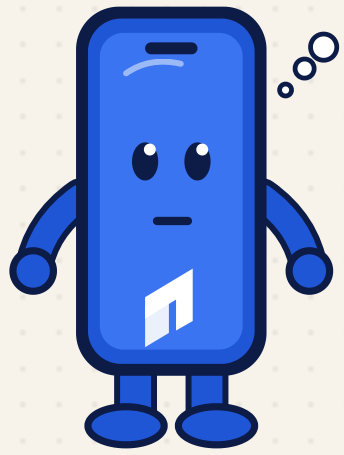

AFTER

A staging copy with made-up data takes the fall instead.

THE LIST

Our four rules

🧪 **Staging first, every time**

✋ **Your AI asks before anything that matters**

📋 **Each app says what it cannot do**

🔧 **We run what we build**

THE MORAL

A tool that claims to do everything is advertising, not a tool.
