MCP, PLAINLY

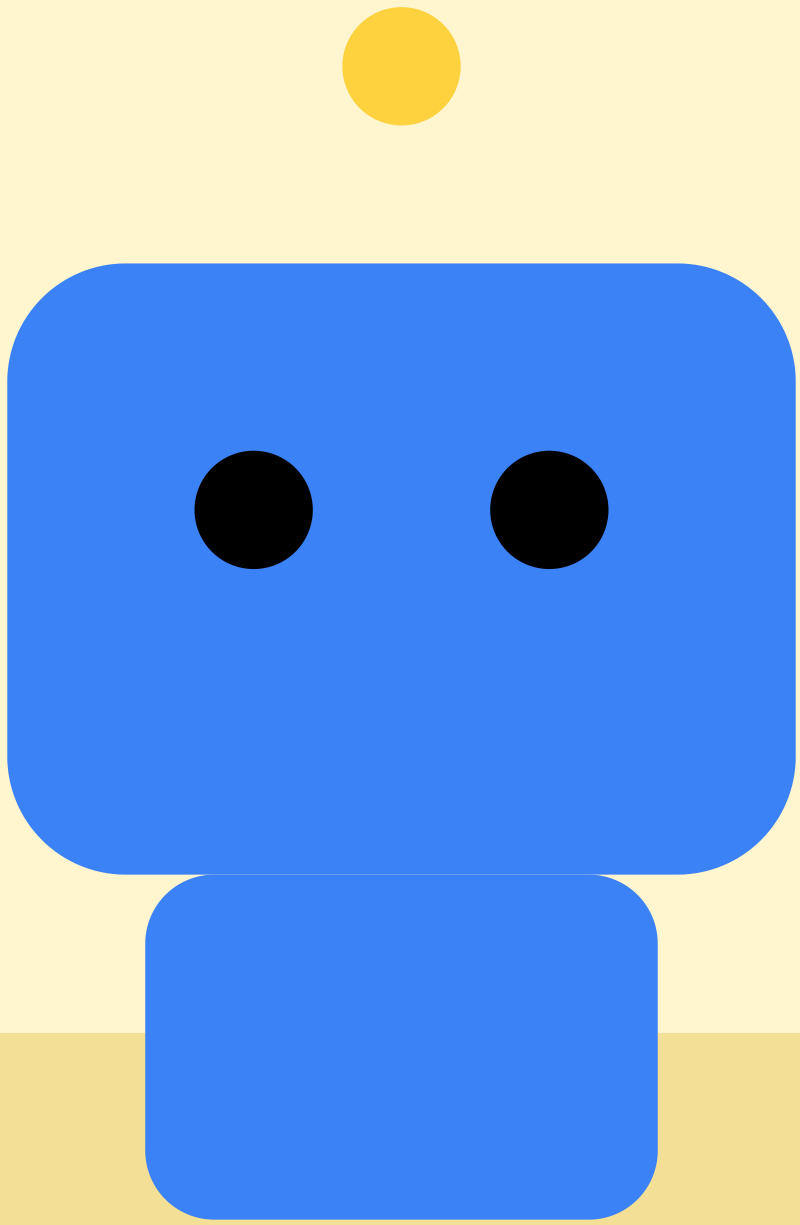

Three myths about MCP

MYTH

PEOPLE SAY

“MCP is just another API”

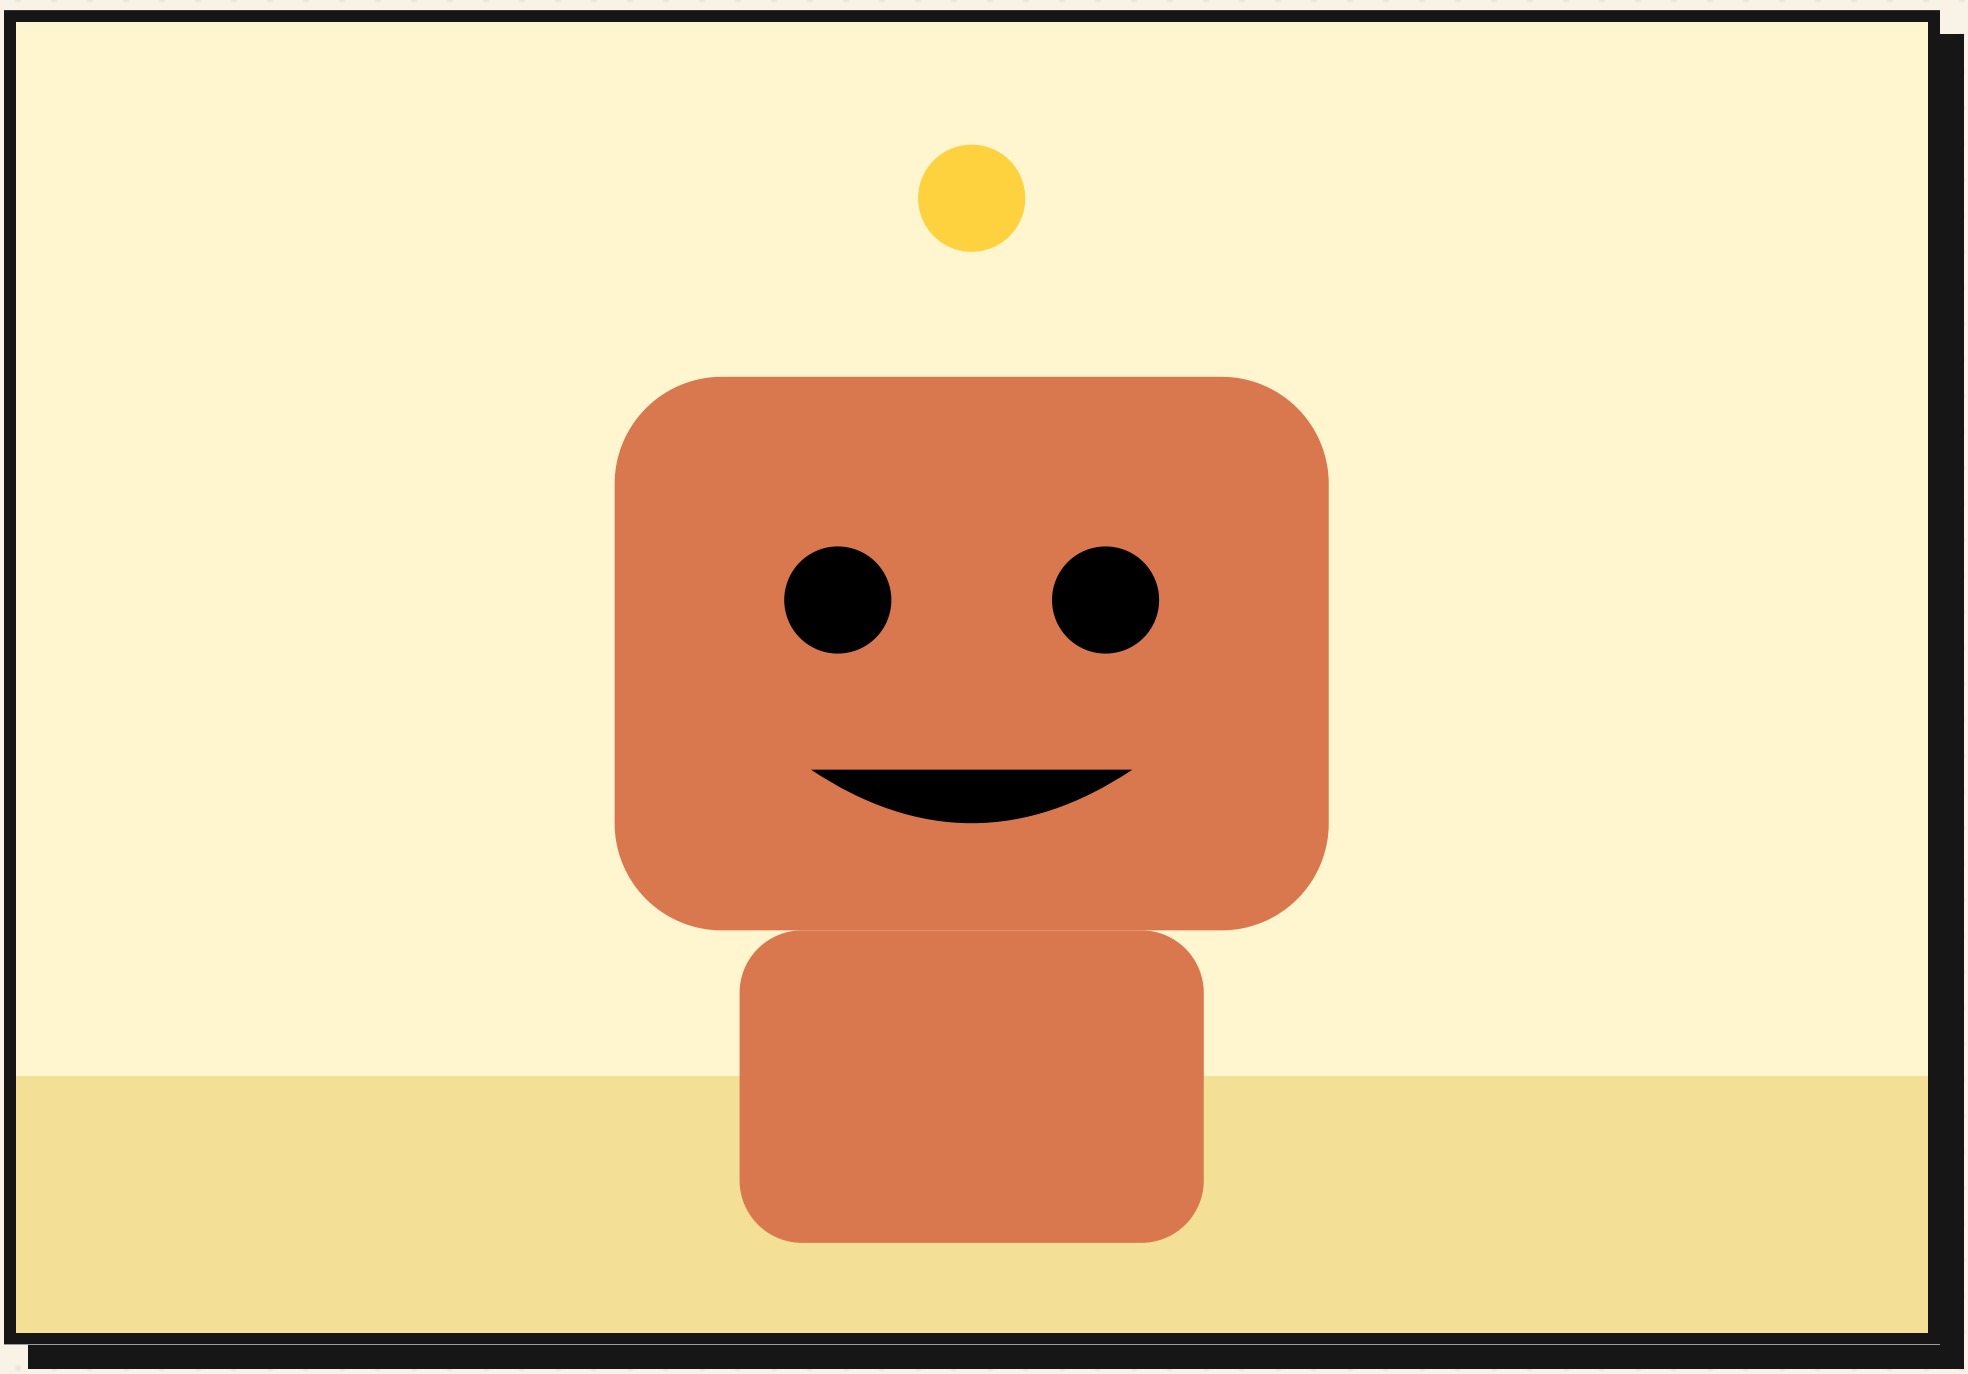

ACTUALLY

An API serves developers. MCP tells an AI which tools exist and what each is for.

MYTH

PEOPLE SAY

“A connected tool is a safe tool”

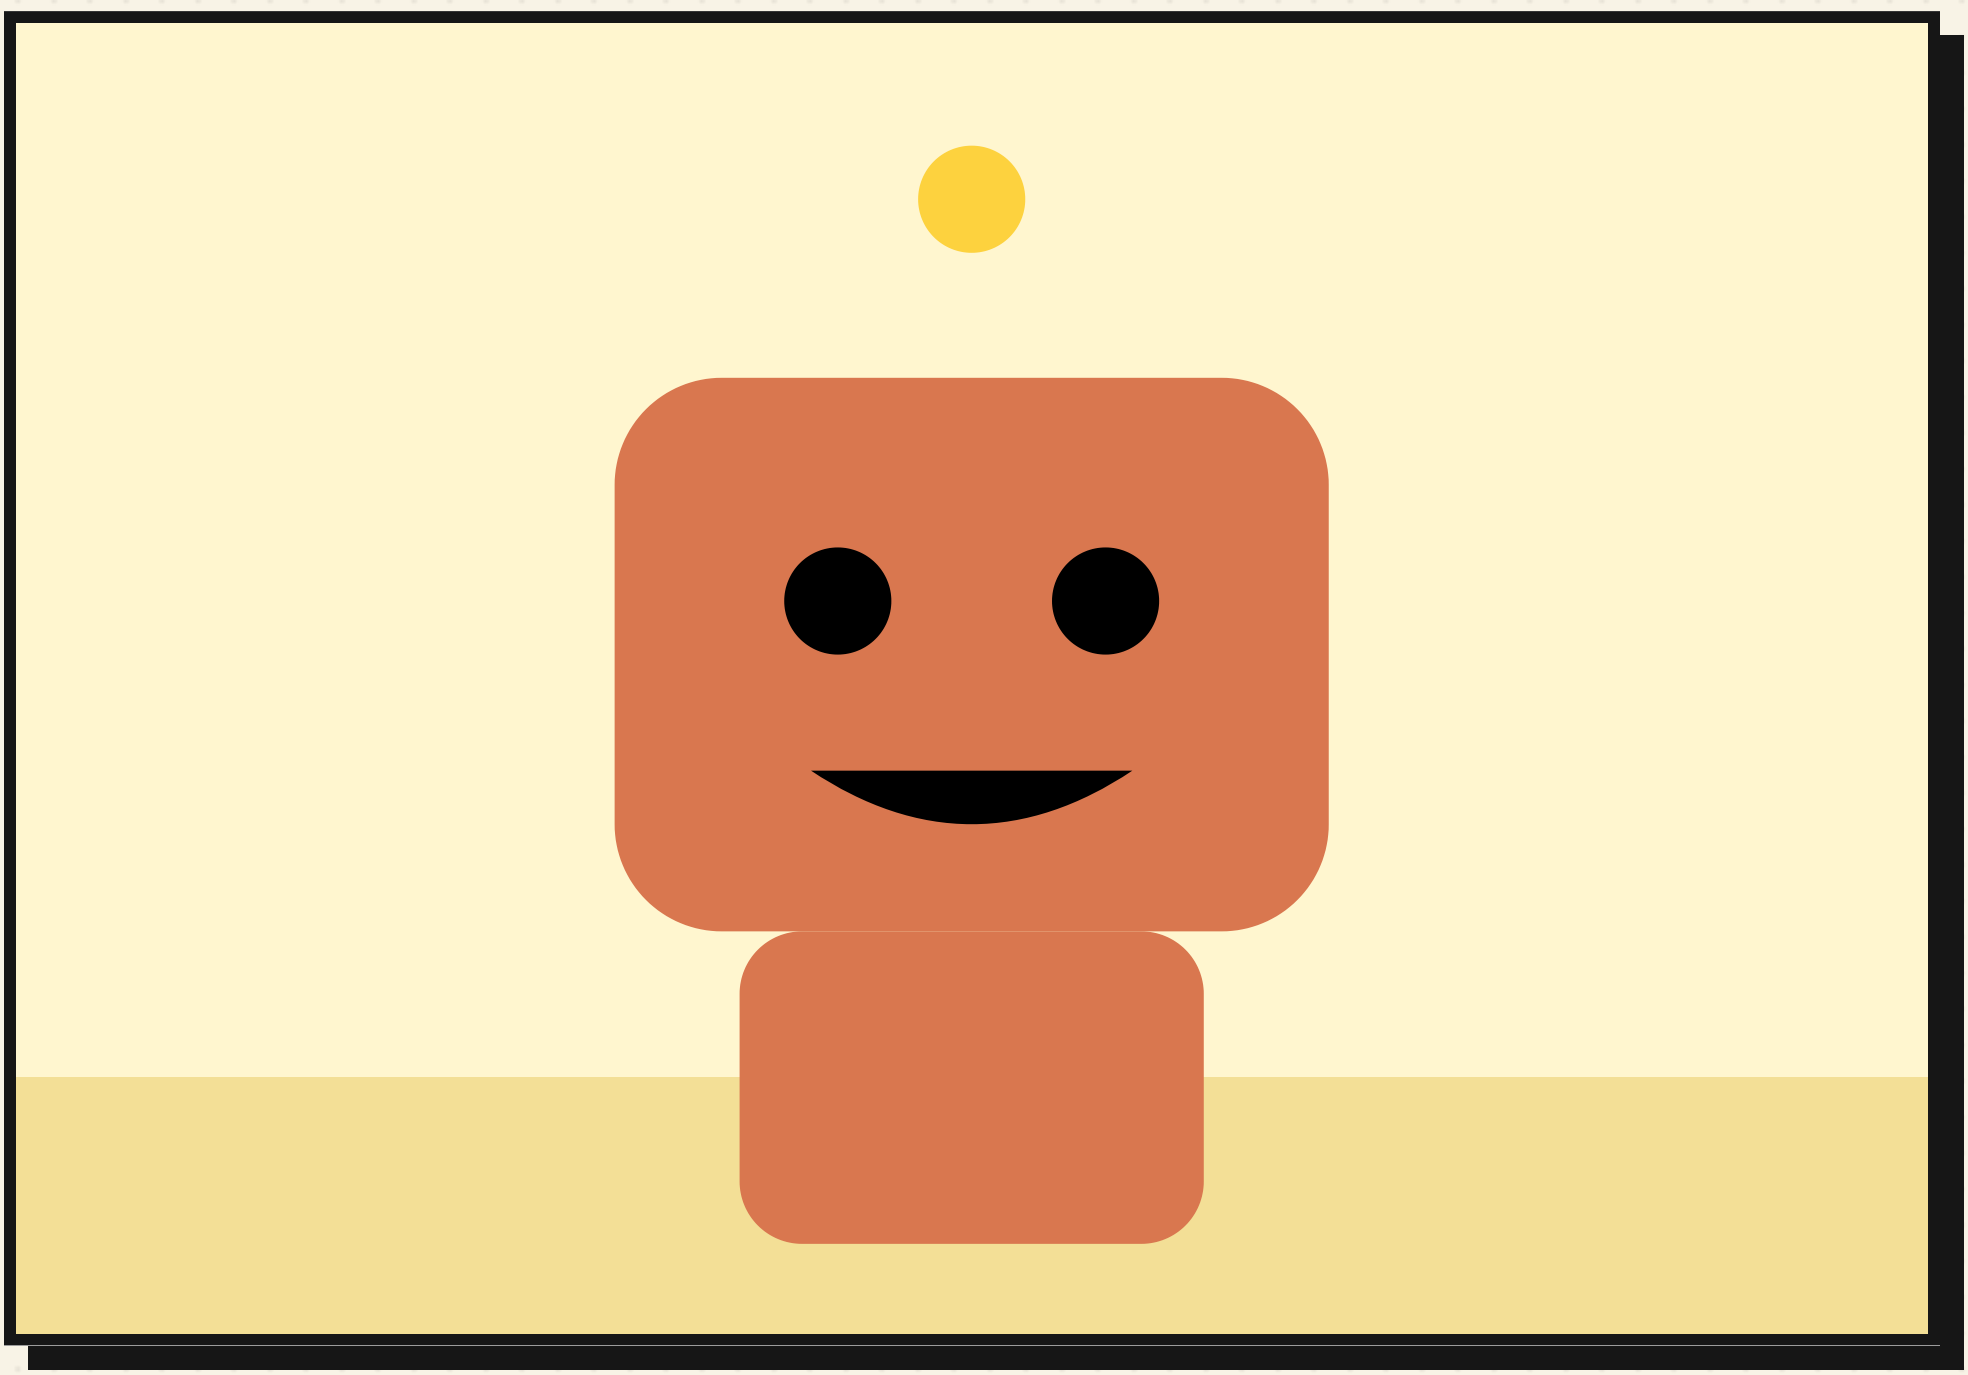

ACTUALLY

Connecting grants access. What the AI may change is a separate decision.

MYTH

PEOPLE SAY

“The AI will ask before anything risky”

ACTUALLY

Only if someone built the gate. Check what your client asks about.

THE MORAL

Ask what it can change, not what it can do.
