MYTH VS FACT

Five things organisers believe about check-in

FIVE BELIEFS

01 ~~You need an event check-in app.~~

02 ~~You need scanner hardware.~~

03 ~~No signal at the venue means no tickets.~~

04 ~~A ticket used twice gets in twice.~~

05 ~~Free events need a different process.~~

None of them is true. Swipe for what actually happens.

MYTH 1 OF 5

WHAT PEOPLE BELIEVE

You need an event check-in app.

MYTH

WHAT ACTUALLY HAPPENS

You need a phone and a ticket code. Nothing to install on either side.

MYTH 2 OF 5

WHAT PEOPLE BELIEVE

You need scanner hardware.

MYTH

WHAT ACTUALLY HAPPENS

The phone in your hand is the scanner.

MYTH 3 OF 5

WHAT PEOPLE BELIEVE

No signal at the venue means no tickets.

MYTH

WHAT ACTUALLY HAPPENS

The code is inside the email itself, not behind a link.

MYTH 4 OF 5

WHAT PEOPLE BELIEVE

A ticket used twice gets in twice.

MYTH

WHAT ACTUALLY HAPPENS

The second check-in says it was already used, and shows when.

MYTH 5 OF 5

WHAT PEOPLE BELIEVE

Free events need a different process.

MYTH

WHAT ACTUALLY HAPPENS

A free ticket gets a check-in code like any other.

THE MORAL

The best check-in app is the one nobody has to install, learn or find at 6:58pm.
