RUN SHEET AUDIT

Search your run sheet for "networking"

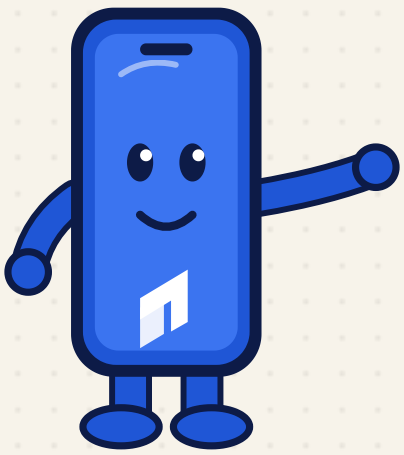

Then ask three questions of every line you find.

SWIPE →

THE LIST

Three questions per line

👀 Who is in the room?

If they can't find out before, they spend the break finding out.

💬 What is the first line?

A prompt, a question, a reason. Borrowed words beat invented ones.

📌 Where does it live?

"An app to install" means about a quarter of the room sees it.

NO ANSWERS?

A line with no answers is a coffee break. That's fine. Just call it one.

THE MORAL

The coffee queue: the only networking format with 100% adoption.
